<sup>1</sup> This is the individual unique number of the course reserved in the Pod. You will not enter this number during registration, but you will need it to use the UT Planner tool.

<sup>2</sup> This is the course number. C S 312 = Computer Science, course number 312. The first number of a course number equals the number of credit hours. C S 312 is a three-credit hour course. An average, full-time course load is 12-15 hours.

<sup>3</sup> Large courses will typically meet two-three times per week in lecture format with the professor. This is usually the first line of a multi-line course time listing.

<sup>4</sup> The second time listed is the mandatory discussion section, which is often under 25 students and taught by a teaching assistant. M 408C Calculus, for example, meets 5 days a week. (MWF with the professor, TTH with the TA)

<sup>5</sup> UGS 017 is your weekly Pod meeting. It will hold the space on your schedule, but does not add to your total credit hours. This is not the same as UGS 302/303. You still need to add a UGS 302/303 Signature Course.

<sup>6</sup> Back-to-back classes are fine! Each classe releases 10-15 mintues early for walking time.
