Call for Sponsorship

The Workshop on Clustering High Dimensional Data and its Applications is devoted to bringing together researchers from academia, government and industry working on problems involving clustering and its applications. The workshop is run in conjunction with the SIAM International Conference on Data Mining (SDM). The workshop started in 2001 and has steadily grown to be widely accepted as a key forum to present new findings in clustering high dimensional data. Attendees hear about very recent research results and are able to speak directly with their developers.

Sponsorship Opportunities

The workshop offers a variety of sponsorship opportunities suitable for small as well as large organizations. The opportunities include complimentary registrations, student travel scholarships, invited speakers travel support. Sponsors of the workshop will gain visibility for their companies, demonstrate their support of critical clustering related research and development, and contribute to the success of the workshop.

Sponsorship Levels

Three levels of sponsorship are available depending on the US dollar amount of the contribution:

Gold	$1,000 or more
Silver	$500
Bronze	$300

Sponsorship Benefits

Depending on the level of sponsorship, a sponsor will receive the following additional benefits:

Gold Sponsor
Company logo on the workshop website and on the inside front cover of on-side collateral materials e.g. Workshop Proceedings, Program Guide, Pocket Program, Attendee List, etc.

Silver Sponsor
Company logo and write-up (50 words) on the inside front cover of Workshop Proceedings.

Bronze Sponsor
Company logo and write-up (25 words) on the inside front cover of Workshop Proceedings.

Potential sponsors should contact Jacob Kogan at kogan@math.umbc.edu with the potential sponsor's contact information including person to contact, telephone number, return e-mail address, level of sponsorship desired, and any other questions.
