

Booting Linux on the ACL2 Model of the x86 ISA

Yahya Sohail Warren A. Hunt, Jr

University of Texas at Austin

November 13/14, 2023

Booting Linux

- ▶ Started with the model of the x86 ISA present in the ACL2 community books
- ▶ Added limited exception/interrupt handling, a timer, and a TTY device
- ▶ Made a number of corrections to the model
- ▶ Modified the Linux kernel to add drivers for custom devices and remove dependence on not present devices
- ▶ Next steps: Fix broken proofs and guard verification
