

# CS313K: Logic, Sets, and Functions

J Strother Moore  
Department of Computer Sciences  
University of Texas at Austin

Lecture 2 – Chap 1, Chap 2 (Sects 2.1, 2.2)

# Announcements

Check the course web page for details concerning the Google Discussion Group and some TA office hours.

The web page now has an ACL2s Installation FAQ link.

Would you like some TA to hold office hours in the evening?

A student asked by email “I am confused about the use of 'c on page 5. Is this saying that you can use an ACL2 object in a Java program?” If possible, please ask your questions in class so everybody hears the discussion.

Since HW1 asks you to quit and restart an ACL2s session, you should make sure all your answers are typed into the Editor Window. [I'll explain.]

**Your Questions?**

# **Fake Quiz (30 seconds) (worth 0 points)**

Pick a random letter, A, B, C, D, or E.

# My Questions

The rest of this “lecture” was a series of quiz questions.

I will not, in general, post the quiz questions.
