CS395T
Reinforcement Learning: Theory and Practice
Fall 2004

Peter Stone

Department or Computer Sciences
The University of Texas at Austin

Week11b: Thursday, December 2nd

Good Afternoon Colleagues

- Are there any questions?

Good Afternoon Colleagues

- Are there any questions?

Logistics

- Hard copies due at 1pm Friday under my door

Logistics

- Hard copies due at 1pm Friday under my door

- Soft copies OK until then too

Logistics

- Hard copies due at 1pm Friday under my door

- Soft copies OK until then too

- I'm on a thesis proposal committee that starts at 1pm

Course Recap

- Reinforcement learning theory

- Then putting it to practice

Course Recap

- Reinforcement learning theory

- Then putting it to practice

- My goals:

  – To expose you in-depth to a major area of machine learning

Course Recap

- Reinforcement learning theory

- Then putting it to practice

- My goals:

    – To expose you in-depth to a major area of machine learning
    – To put you in a position to **understand** current research in the area

Course Recap

- Reinforcement learning theory

- Then putting it to practice

- My goals:

    – To expose you in-depth to a major area of machine learning
    – To put you in a position to **understand** current research in the area
    – To put you in a position to **contribute to** current research in the area

- Reinforcement learning theory

- Then putting it to practice

- My goals:

  - To expose you in-depth to a major area of machine learning
  - To put you in a position to **understand** current research in the area
  - To put you in a position to **contribute to** current research in the area

THANKS!

Final Discussion

- If you got to choose the research that people in the field would pursue, what would you suggest?

  - What new research would you like to see?

Final Discussion

- If you got to choose the research that people in the field would pursue, what would you suggest?

  – What new research would you like to see?

- Can RL aspire to becoming a general cognitive architecture?

  – Is it useful in connection with psychology and neuroscience?

Final Discussion

- If you got to choose the research that people in the field would pursue, what would you suggest?

  – What new research would you like to see?

- Can RL aspire to becoming a general cognitive architecture?

  – Is it useful in connection with psychology and neuroscience?

- What is your overall assessment of the field of RL?
