

Course Intro

Elements of Data Integration (CS 329E)
First Edition

January 19, 2024

Logical Architecture

How this class will work

- You should work collaborative with your partner on all projects.
- A major portion of each class period will be dedicated to project work.
- If you have to miss a class, notify the instructors and your partner in advance.
- Assignments won't come with a complete playbook, but we will provide code samples to help you get started.
- Rubrics will be available only after the grading is complete. You will have 7 days to resubmit if you lost points.
- You and your partner should block off time each week for your project work.
- Our week-by-week schedule is tentative. It may be need to be adjusted based on the needs of the class.
- Share your learnings with the whole class, but be mindful not to overshare.
- Share your feedback with me early and often, especially if you're struggling with the content or have concerns about your partner.
